TEACHER SETUP SHEET

Quieter Chairs, *Happier* Classrooms.

Everything you need to put tennis balls on chair and desk legs, in one page.

STEP 1

How many balls?

Chairs × **2** for back legs only, or chairs × **4** for all four legs.

Chairs	Back legs	All legs
10	20	40
20	40	80
25	50	100
30	60	120
120 (a grade level)	240	480

Desks with legs count too. Add a few spares for the ones that wander off.

STEP 2

Set up in 4 steps

1. **Cut a small X** in each ball (adults only). Or skip it: order pre-cut.
2. **Wipe each ball down.** They're retired tennis balls, so they may carry a little court scent.
3. **Squeeze and push** each ball onto a leg. The rubber grips on its own: no glue, no drilling.
4. **Check every few months** and swap out any that split or wear through.

SAFETY FIRST

Cutting is a grown-up job.

- **Adults only** for cutting.
- Use a **utility knife or heavy-duty scissors**.
- **Cut away from your body** on a stable surface.
- Students **can** help press balls on, count, and wipe.
- Keep cut balls away from little mouths and pets until installed.
- Short on time? **Pre-cut balls** arrive ready to install.

Why it works

Quieter rooms (great for students with sensory sensitivities), fewer floor scuffs, and chairs that slide instead of scrape.

Need more balls?

Classroom packs from $20, with a pre-cut option. Ordering for a whole school? School quotes are 50¢ a ball.
